

## About Andy Cooper

Andy is an Initiate of the both the Western Mystery Tradition and the Hawaiian Huna Magical Tradition. He is a Reiki Master, a Master Hypnotherapist, a Certified Trainer of Neuro-Linguistic Programming (NLP) and he holds a PhD in Esoteric Studies from the American Pacific University.

Andy combines his magical experience with current methods of personal development to really enable magicians and students of the occult sciences to support their magical training through effective personal development working at the emotional and mental levels underpinning the magical training at the spiritual level.

## NLP & Magic: The New Hermetics?

*A One-Day Workshop  
Oddfellows Hall, Ipswich  
Saturday 26<sup>th</sup> November 2005*

# NLP & Magic: The New Hermetics?

## What is NLP?

NLP or Neuro-Linguistic Programming is a system of personal development and psychotherapy that integrates a number of different disciplines into a coherent system for very fast and effective personal change.

NLP includes quick, and extremely effective ways of clearing unsupportive patterns of behaviour and negative emotions, creating permanent change and opening the way for new opportunities and new choices.

This one-day workshop explains what NLP is and examines how NLP can assist the practical occultist in a variety of powerful ways.

## NLP & Magic

After months or years of magical training many people find that they still cannot move beyond their emotions, fears and unsupportive beliefs about themselves. This prevents them from really making magic work in their lives and from creating a truly magical life. This is why both Dion Fortune and Israel Regardie insisted that psychotherapy is an essential complement to magical training. NLP can provide that psychotherapeutic support to magicians and in addition provide new insights into the mechanics of practical magic. NLP's powerful behavioural modeling techniques can be used to assist students in gaining new skills rapidly and effectively.

## What Will I Learn?

This workshop explains what NLP is and the basic principles upon which it is built. You will examine the relationship between NLP and the Western Mystery Tradition, and see how NLP can assist you to accelerate your progress along the magical path. The workshop will include practical exercises and conclude in the evening with a ritual, utilising both traditional magical techniques and processes drawn from NLP.

## Details

10.00am - 10.00pm Saturday 26<sup>th</sup> November 2005 at the Oddfellows Hall, 37 High Street Ipswich. The cost of the workshop is £50 including tea, coffee & refreshments but excluding meals.
